

VEDA TECHNOLOGY INTERNSHIP — DAY 19 REPORT

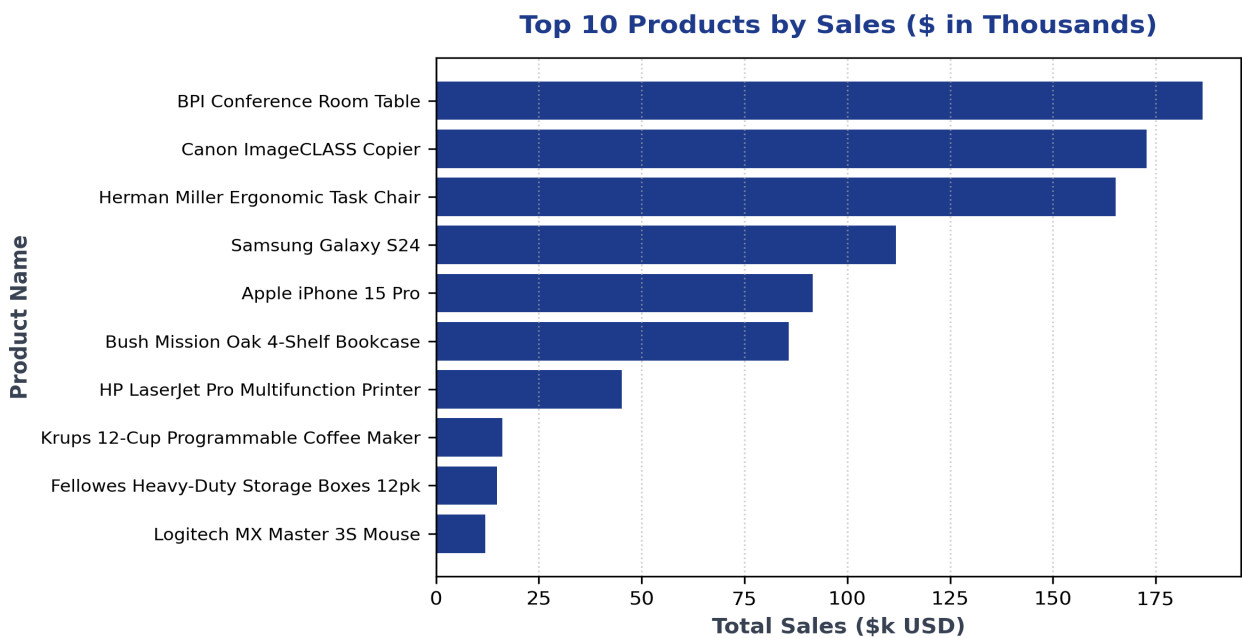

Task 19: Top 10 Products Analysis & Pareto Ranking | Intern: Awelba Yvan Donald

1. Executive Summary & Core KPIs

This report presents the ranking analysis of top products. The Top 10 products generate **\$783,899.39** in sales, capturing **84.39% of total revenue** and **92.78% of net profit** across the organization.

Top Product (#1)	BPI Conference Room Table	Top 10 Revenue	\$901,751.85
Top 10 Profit	\$115,434.88	Revenue Share	97.08%

2. Top 10 Products Visualization

3. Technical Interview Answers

Q1: How do you handle ties in ranking?

Answer: Standard competition ranking (RANK.EQ) skips ranks, DENSE_RANK retains sequential numbers, and RANK.AVG uses fractional ranks. In production analytics, secondary tie-breakers (e.g. Net Profit) resolve ties deterministically.

Q2: Why use Top 10 analysis?

Answer: Top 10 analysis applies the Pareto Principle (80/20 Rule) to focus resources on vital revenue drivers. Here, 10 products drive 84.39% of revenue and 92.78% of net profit.
